Projects

Portfolio

my personal website

My personal website contains all my information, projects, and means of communication with me, and shows most of my capabilities

E-Commerce

e-commerce design

I make an e-commerce app design only with more than 20 page

Movies

Movie Site

I make this movie site using redux in react.js , i call data from API with redux and display the movies in site , you can search , watch and show movie details

To Do App

to do list app

To arrange your original tasks in the task list, and they will not be deleted even if you close the site because they are dependent on local storage on JS
